terday afternoon was a decided im provement over the previous exhibitions of the Phoenix-League and regame it was for it is in its final record almost as bad as the preceding games. It happened though that the bad spots occurred mostly in the last two innings so that for six or seven innings the teams put up a pretty good quality of ball. The improvement all around was decidedly flattering for though the Valley came out way to the bad, for several innings it kept the Capitol team more than half scared. The result of the three games played to date is as follows: Phoenix National..... Capitolwon 2, lost 1

The Phoenix National is to date the undefeated champion but it will have to look to its laurels henceforth for that they are out for business.

COMMERCE

New York, May 7.-The brief Saturday sessions of the stock exchanges on the continent of Europe and in New York, further curtailed in the latter. and in Chicago by the early adjournment were long enough to give opportunity for a demonstration of financial confidence in the situation left as the result of the sudden death of the king of England. No exchanges were open in Great Britain, where of course, the most direct result of the event will be felt.

The suddenness of the event left it without the powerful sentimental influence of a coming portent. The opportunity to be offered by the two-day interval for preparation before the re-sumption of next week's business evidently had its part in absorbing the shock.

Allowance must be made for the part and we can please you if you do business with us.

Some lat reducers are happy though, during the process, but these neither stronger financial interests in the day's nadvance in New York prices. Almost every one feels bad in the Spring. Some have no partic ular sickness, but are debilitated, run-down and weak, and then systems are in a general state of disorder. This deranged condition of the health is due to weak, anaemic blood; the circulation is infected with impurities which have diminished its natural nourishing powers, and the body is suffering from deficient blood nutriment. The refuse and impurities which naturally accumulate in our systems are not properly expelled in Winter, because those members whose daty it is to perform this work of drainage do not receive sufficient stimulation from outdoor exercise, and therefore grow will and sluggist; in their action; nor is the skin as active in eliminating waste, maters in cold weather because the pores are not so open as in warm seasons.

These Winter accumulations pollute the blood and largely desironlost 2 its nutritive qualities, and when Spring comes, and everything takes on new life, and we change our method of living, the circulation is so weakened that it is unable to supply the increased demands of the system. Then we suffer from weakness, nervousness, loss of appetite. lassitude, etc. There is a constant worn-out feeling, sleep is not refreshing, and we do not feel able to perform the ordinary duties of daily life. This disordered condition demands the use of a tonic, and it should be one which has the additional qualities of a first class blood
